CLocal

Your shop guide

Run your page. Post a LocalGem.

Everything you need to get going, in the order you will do it. It takes a few minutes, and you can change any of it later.

1. Get into your page

1. Open your **claim link** from our message and sign in or create your login. You choose your own password.
2. You land on your shop. Your page already exists, so nothing is built from scratch.
3. To change your password later, open **Account** in the app, then **Change password**.

2. Make your page yours

1. Tap **Tools** at the bottom, then **Edit profile**.
2. Check what shoppers see: your name, address, opening hours, photos and a short description.
3. Save. Changes show on the map and your page straight away.

Stories. Premium pages can post short videos (Hot Now stories) from **Tools**.

3. Post a LocalGem

1. Tap **Post a LocalGem** on Tools or Home.
2. Choose **one-time** (a quiet Tuesday afternoon) or **recurring** (every week), then **Next**.
3. Add a photo, a short **headline** like "20% off pastries", and a **till code** your staff will recognise.
4. Optional: set a **quantity**. Leave it empty for no limit. A LocalGem with no limit stays open until it ends.
5. Enter **what the deal is worth** in pounds, for example 3.50 for a free coffee.
6. Check the **Preview**, make sure your staff know about it, then tap **Post LocalGem**.

When a customer comes in.

This is the part your staff need to know. It takes a few seconds at the till.

What the customer does

1. They see your LocalGem on the map or in the app and tap **Reveal code**.
2. A QR code and a short code appear on their phone.
3. They show it at the till.

What you do

1. Open the app and tap **Scanner** at the bottom.
2. Scan the customer's QR code. If the camera will not scan, type their code in and tap **Redeem / count sale**.
3. You see a confirmation, and the sale is added to your dashboard.
4. Give the customer their deal.

Always scan. Scanning is how the sale is counted, and it is how your customer earns their coins. If you do not scan, they miss out.

Good to know

1. A LocalGem with a quantity counts down each time you scan, and closes when the last one goes.
2. A LocalGem with no quantity stays open for the whole time you set.
3. You only pay when a customer redeems at your till. The amount is shown to you before you post. No redeem, no fee.
4. Your **dashboard** on Home shows your views and redemptions for the week.

Stuck?

1. Email **hello@clocal.co.uk** and Paul will sort it.
